SUMMARY

Product analyst with five years of experience in consumer apps and online retail. Designs and analyses A/B tests and builds the product metrics that teams use to decide what to build.

EXPERIENCE

Product Analyst, Lalang Rides | Singapore | Aug 2023 - Present

- Defined activation and 30-day retention metrics for the driver app and built the weekly product metrics review in Looker.
- Designed and analysed 14 A/B tests on onboarding and pricing screens, including sample size planning and a written note on what each result could not show.
- Wrote BigQuery SQL on event tables, using window functions to build funnel and cohort datasets.
- Analysed onboarding funnel drop-off in Python (pandas) and recommended removing two steps; completion rose from 61% to 70% in the follow-up test.
- Present monthly findings to product managers and designers.

Junior Business Analyst, Serangoon Online Books | Singapore | Aug 2021 - Jul 2023

- Built weekly sales reports in Google Sheets and Looker Studio for the marketing team.
- Wrote MySQL queries on order and customer data.
- Checked daily order data for duplicates before reports were sent.

EDUCATION

Bachelor of Science in Business Analytics, GPA 4.0 / 5.0

Singapore University of Social Sciences | Jul 2017 - Jun 2021

Relevant coursework: Statistics, Database Systems, Experimental Design
