SUMMARY

Senior data analyst with seven years of experience in e-commerce and healthcare operations. Leads forecasting, dashboarding and experiment analysis for operations and product teams.

EXPERIENCE

Senior Data Analyst, Katong Market Online | Singapore | Feb 2022 - Present

- Lead analysis for the seller operations and checkout teams, covering about 2 million monthly orders.
- Built and maintain Tableau dashboards on stock availability, delivery times and checkout conversion, used by 60 managers in operations and product.
- Write and review Snowflake SQL, including window functions, for weekly forecasting and funnel datasets.
- Designed and analysed A/B tests on checkout changes with power calculations and agreed success metrics; one test raised checkout conversion by 1.8 percentage points.
- Built a Python demand forecast for the top 500 products that cut stock-outs by 12% in pilot categories.
- Present quarterly insights to the operations and product leadership teams.

Data Analyst, Novena Clinic Group | Singapore | Jul 2019 - Jan 2022

- Built Power BI dashboards on clinic waiting times and patient volumes for 20 clinic managers.
- Wrote SQL Server queries combining appointment and billing data.
- Set up data quality checks that reduced errors in the monthly management pack.

EDUCATION

Bachelor of Science (Honours) in Statistics, GPA 4.2 / 5.0
