SUMMARY

Product analyst with under two years of experience in education technology. Works with SQL, Python and dashboards to track how learners use the app.

EXPERIENCE

Product Analyst, Punggol Learning Labs | Singapore | Mar 2025 - Present

- Track weekly active users and lesson completion funnels in Metabase dashboards.
- Analysed 3 A/B tests on reminder notifications with a senior analyst, including checking whether sample sizes were large enough.
- Write PostgreSQL queries on event tables and analyse results in Python (pandas).
- Share short weekly notes on product metrics with the product manager.

Data Analytics Intern, Changi Travel Deals | Singapore | Jun 2024 - Dec 2024

- Cleaned booking data in Python and built charts for the marketing team.
- Wrote simple SQL queries to count bookings by channel.
