SUMMARY

Backend software engineer with five years of experience building Python services for payments and logistics.

EXPERIENCE

Software Engineer, Tanjong Rhu Payments | Singapore | Jan 2023 - Present

- Design and build Python (FastAPI) services that handle settlement for about 9,000 merchants.
- Designed versioned REST APIs used by the mobile and partner teams, with input validation and clear error codes.
- Modelled PostgreSQL schemas and added indexes that cut the slowest report query from 40 seconds to 2 seconds.
- Write unit and integration tests with pytest; raised test coverage of the settlement service from 55% to 85%.
- Deploy with Docker and GitHub Actions to AWS ECS, and take part in on-call using Grafana and Prometheus alerts.
- Review code for 4 engineers and write design documents for new services.

Software Engineer, Ang Mo Kio Logistics Tech | Singapore | Jul 2021 - Dec 2022

- Built Django REST APIs for warehouse stock tracking.
- Wrote MySQL migrations and pytest tests for new features.
- Built simple internal admin pages with Django templates and some JavaScript.

EDUCATION

Bachelor of Engineering (Honours) in Software Engineering, GPA 4.1 / 5.0

Singapore Institute of Technology | Sep 2017 - Jun 2021

Relevant coursework: Distributed Systems, Database Systems, Software Testing

SKILLS

Languages: Python, SQL, JavaScript (basic)

Frameworks: FastAPI, Django

Infrastructure: PostgreSQL, MySQL, Docker, AWS, GitHub Actions, Grafana

Testing: pytest
