SUMMARY

Full stack engineer with almost five years of experience building Java services and React interfaces for insurance and retail systems.

EXPERIENCE

Full Stack Engineer, Raffles Place Insurance Digital | Singapore | Jun 2023 - Present

- Build Java Spring Boot services and REST APIs for the online claims system, used by about 30,000 customers a month.
- Designed PostgreSQL schemas for claims data and wrote Flyway database migrations.
- Write JUnit and integration tests, and set up contract tests between frontend and backend.
- Build React and TypeScript screens for the claims form and connect them to the REST APIs.
- Deploy with Docker and Kubernetes on Azure through a Jenkins CI/CD pipeline.

Software Engineer, Bishan Retail Systems | Singapore | Jan 2022 - May 2023

- Built Java REST APIs for a point-of-sale back office.
- Fixed production issues found through logging and on-call support.
- Built React components for the store manager dashboard and wrote Jest tests for them.

EDUCATION

Bachelor of Computing in Computer Science, GPA 4.0 / 5.0

National University of Singapore | Aug 2017 - Dec 2021

Relevant coursework: Software Engineering, Database Systems, Web Development

SKILLS

Languages: Java, TypeScript, SQL

Frameworks: Spring Boot, React

Infrastructure: PostgreSQL, Docker, Kubernetes, Azure, Jenkins

Testing: JUnit, Jest
